

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

INDEX

BRENKE, W. C., On the Convergence and Differentiation of Trigonometric Series,	87
CARMICHAEL, R. D., Multiply Perfect Numbers of Three Different Primes,	49
——, Multiply Perfect Numbers of Four Different Primes,	149
CURTISS, D. R., On Certain Theorems of Mean Value for Analytic Functions of a Complex Variable,	118
HEDRICK, E. R., A Peculiar Example in Minima of Surfaces,	172
HUNTINGTON, E. V., The Fundamental Laws of Addition and Multiplication in Elementary Algebra,	1
HURWITZ, W. A., Note on the Definition of an Abelian Group by Independent Postulates,	94
LEHMER, D. N., On Maximum and Minimum Values of the Modulus of a Polynomial,	175
MILLER, G. A., Note on the Use of Group Theory in Elementary Trigonometry,	97
MOORE, C. L. E., Circles Orthogonal to a Given Sphere,	57
PORTER, M. B., On a Criterion of Pringsheim's for Expansibility in Taylor's Series,	45
——, On the Polynomial Convergents of a Power Series,	189
SAUREL, P., On Functional Determinants,	73
SINCLAIR, MISS M. E., On the Minimum Surface of Revolution in the Case of one Variable End-Point,	177
SCOTT, MISS C. A., Note on Regular Polygons,	127
STEPHENS, R. P., On a System of Parastroids,	159
WHITE, MISS M. B., The Asymptotic Lines on the Anchor Ring,	103
WILSON, E. B., Involutory Transformations in the Projective Group and its Subgroups,	77
——, The Revolution of a Dark Particle about a Luminous Center,	135
